

CLEAN CAPTAIN BOARD GAME

Dice

DIRTY
CARDS

CHALLENGE
CARDS

CLEAN
CARDS

MATERIALS

1 dice, 1 game board, 20 brown cards, 21 blue cards, 14 green cards

Note: Students will pick their own token to move as their game piece. Their token should be small enough to fit on the game squares and also unique to them, such as a coin, bead, rock, etc.

INSTRUCTIONS

1. Game can be played with 2-6 people. For young students, we recommend including at least 1 player who can read well and guide the other players.
2. Players will roll the dice to see who goes first. The person with the highest number will have the first turn, with players continuing in a clockwise manner after.
3. All players start with their tokens on "START".
4. In each turn, the players will roll the dice one time and move the corresponding number of spaces along the game board.
5. If they land on a blue space, they will pick a **blue "Clean" card** and follow the directions. All blue cards move the player **forward** or give them an extra turn for rolling the dice.
6. If they land on a brown space, they will pick up a **brown "Dirty" card** and follow the directions. All brown cards move the player **backwards** or lose them their next turn at rolling the dice.
7. If they land on a green space, they will pick up a **green "Challenge" card** and complete the challenge. All green cards give a task for the player to complete. The other players will judge if the player is correct. If yes, he/ she will move forward or get an extra turn. If no, then he/she will not move forward or backwards in this turn.
8. In each turn, the player will only pick up one card for the first space they land on. However, some cards give them an extra turn, which means they will roll again and then get another card since it is considered a new turn.
9. The first player to reach "END" wins the game!
